

WATERMASTER®

SINGLE POINT BATTERY WATERING SYSTEMS

CONVENTIONAL SINGLE POINT BATTERY WATERING SAVES LABOUR — ONLY WATERMASTER® AND WATERGENIUS® PROVIDE AUTOMATIC WATERING SOLUTIONS THAT GET SO CLOSE TO ZERO LABOUR ON INDUSTRIAL BATTERIES.

WATERMASTER®

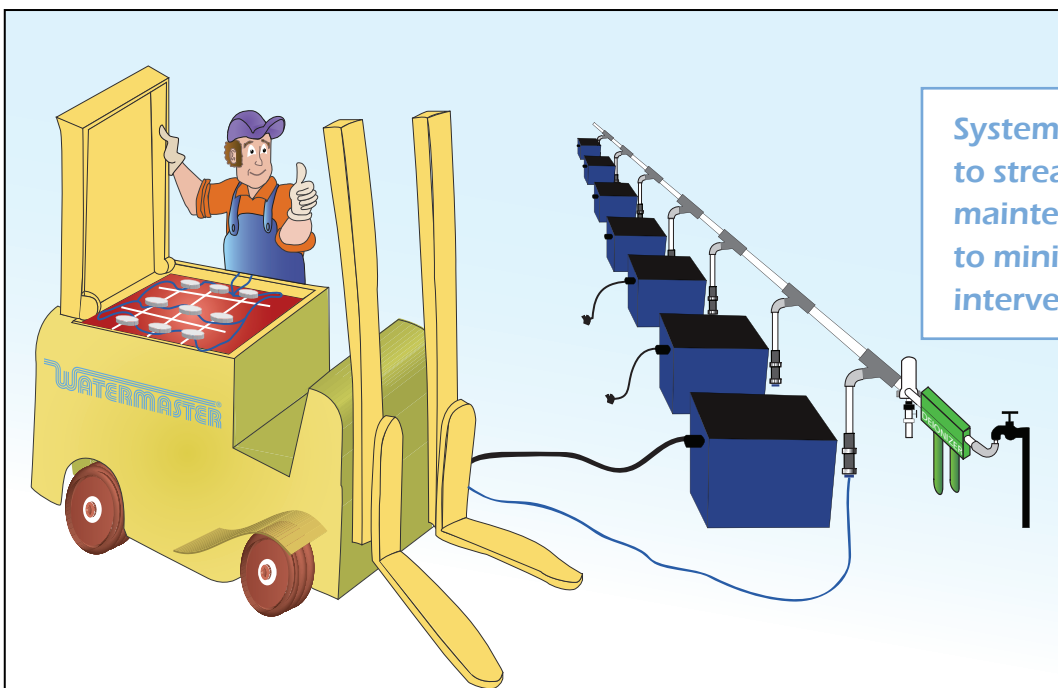

Watermaster® was founded when it was discovered that traction batteries are particularly laborious to water manually, and traction battery lives are severely compromised by misuse.

Battery life is determined to a great extent by a regular and precise watering process. In reality manual watering or the use of service contracts do not adequately provide this and cannot be relied upon to effectively maintain batteries.

Watermaster® is unique in offering a cost effective, fully automatic watering system which eliminates the need for inconsistent and unreliable human handling.

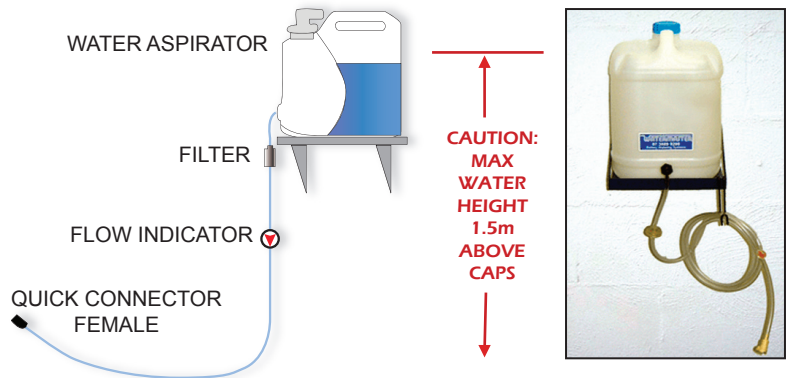

This system can now operate from any available water supply and provides a viable alternative to existing service contracts.

By investing in Watermaster® systems, batteries are watered more efficiently thereby prolonging battery life which not only saves money but also helps in protecting the environment.

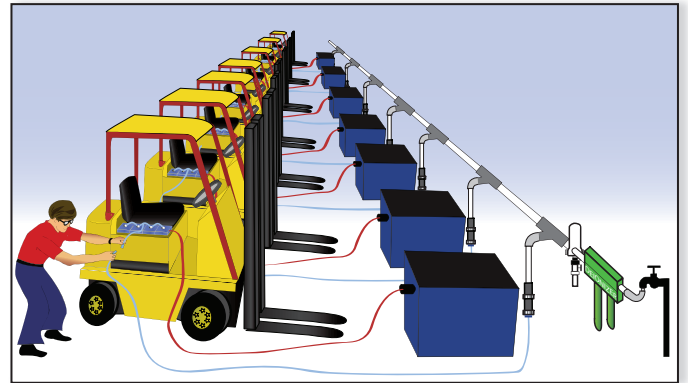

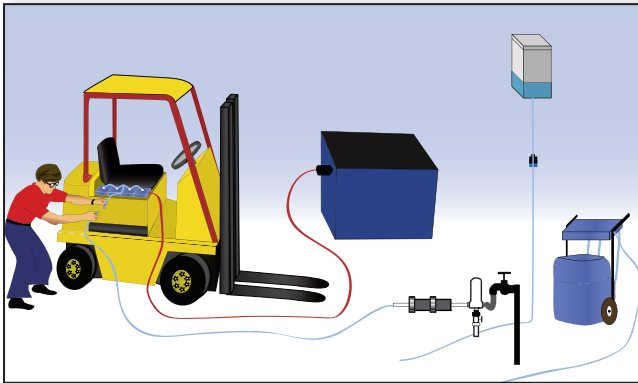

System features geared to streamline battery maintenance and to minimize manual intervention.

GRAVITY FEED SYSTEM

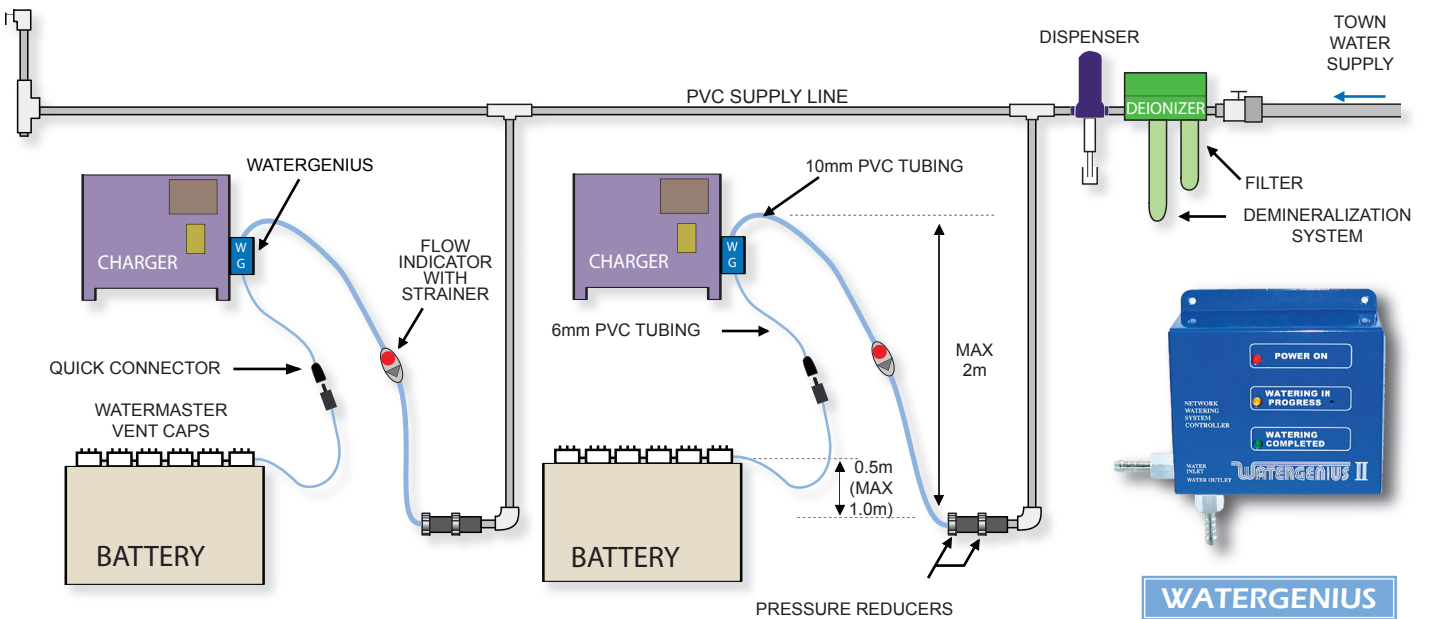

PRESSURE REGULATED SYSTEM

The pressure regulator which maintains a system pressure of 0.15 bar is exclusively supplied by Watermaster®.

AUTOMATIC MULTIPLE BATTERY WATERING SYSTEM

Opportunity to fully integrate charging, watering and battery usage.

At the end of every charge a remote solenoid is activated by the Watergenius® thereby starting water flow to each cell. The only effort required to operate the system is to plug and unplug the quick connectors along with the electrical plugs.

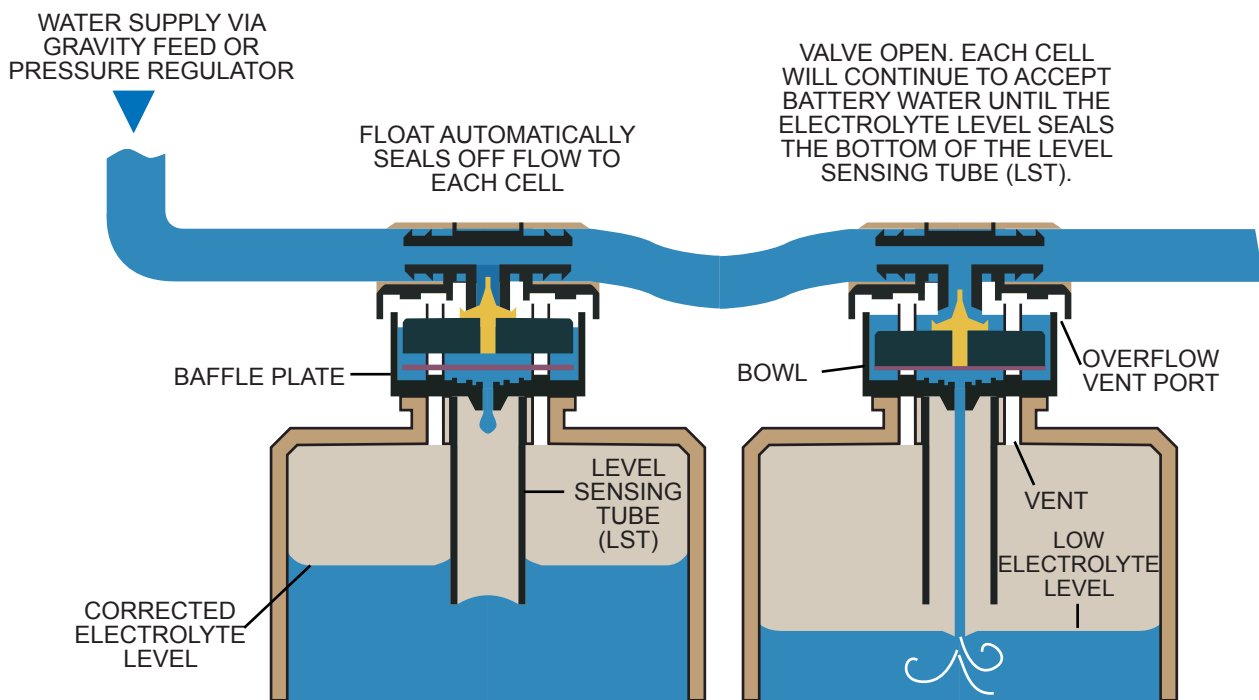

The WATERMASTER®

...is the heart of the automatic watering system.

The experience continues to highlight that only avoidance of mechanical complexity - in short simplicity - can lead users directly onto the high road for optimal convenience and greatest reliability in single point battery watering.

THE PRINCIPLE BEHIND WATERMASTER®

AIR PRESSURE IN THE (LST) STOPS WATER FLOW INTO THE CELL WITHOUT ANY MOVING PARTS.

Our satisfied customers include:

- 🔹 Coca-Cola;
- 🔹 Boeing;
- 🔹 Goodyear Tire & Rubber;
- 🔹 Ford, GM, Chrysler;
- 🔹 Tennant Company;
- 🔹 Aldi Food Stores...

...to mention but a few.

For more comprehensive information inquire as to what the Watermaster® system can mean to the logistics of your company.
